

Product Technical Data Sheet

Product Code: CT00M003JOO

Product Description: Opaque, colored, flexible, monomeric PVC

Typical Usage: CT is an opaque, colored, flexible, monomeric vinyl product formulated for use in various markets such as label/decal, furniture and audio/video. It exhibits compatibility with a variety of permanent and pressure sensitive adhesives. It has excellent surface quality, gloss, and product consistency. It ages well for short to medium term applications.

- Available in matte, intermediate and gloss finishes (OMO indicated "matte" finish)
- Consistent physical properties
- Available from 0.003" to 0.012" thick
- Available in custom widths from 30" to 65"

Physical Attributes

Shrinkage	- 6% maximum	ASTMD1204
Modulus	M Flex 2150-2650 psi CD	20"/min with 5" jaw separation
Gauge	+/- 5% of target	TMI visual gauge
Gloss	35 – 45	60 degree Gardner gloss meter - Average of 5 readings across web
Surface Smoothness	5 max control side 20 max non control side	Air resistance
Width	+ 1/4" -0"	
Color	Visual to standard	

Suggested Packaging 6" heavy duty cores, 975 yards per roll, three rolls per skid

NOTE: This is not a specification. The TDS gives general information about expected physical properties. A signed specification will be established with the customer prior to actual production that reflects the exact requirements of that customer.
